FOUNDER & PRODUCT ARCHITECT — AI-FIRST PLATFORMS

Volodymyr Pasichnyk

UK-based · Operating globally (Europe & US)

Profile

I'm a founder building AI-first platforms that turn deep engineering into real products — from early concept to market-ready systems.

My focus is product architecture, scalable systems, and execution in complex and regulated environments.

Based in the UK. Operating globally across Europe and the US.

Background includes principal-level engineering, platform architecture, and engineering leadership.

What I'm Building

AI-first platform patterns I'm actively shaping:

- AI-assisted workflows: voice → intent → action pipelines
- Context systems for long-running tasks and decision-making
- Hybrid on-device + cloud inference patterns
- Observability and analytics feedback loops for AI products

Skills & Focus Areas

AI Products & Agents

Voice workflows, orchestration, context systems, evaluation and observability patterns for AI products.

Platform & Architecture

Distributed systems, scalability, reliability, and pragmatic product architecture that survives real constraints.

Cloud & Data

Cloud architecture, data pipelines, observability, and feedback loops that turn product usage into iteration speed.

Leadership & Product

Technical strategy, mentoring, and cross-functional execution from concept to delivery.

Experience

Founder — Codecot / Stealth Venture

Present · , UK-based · Operating globally

- Building AI-first platforms and product infrastructure.
- Focus on architecture, scalability, and product strategy.
- Execution across complex and regulated environments.

Principal-level Engineering & Architecture (Background)

- Led architecture and delivery of large-scale systems in regulated environments.
- Built high-performance product experiences and analytics platforms.
- Experience across Europe and the United States.

Highlights

- Founder building AI-first platforms
- Product architecture & scalable systems
- Principal-level technical background in complex environments
- UK-based, operating globally (Europe & US)
